1. Applicant's election of group I in the paper filed 10/30/2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claim 4 should have been listed with Group I, not Group II and is now included in Group I. Claim 5 should have been listed with Group II, not Group I and is now included in Group II. Claim 18 should have been listed with Group II and is now included in Group II.

2. Claims 2,3,5,6,8,9,11,12,14,15,17-55 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the paper filed 10/30/2003.

3. Applicant is required to remove the nonelected inventions from the claims (eg. "expressing within" in claim 1, etc.).

4. This application contains claims directed to the following patentably distinct species of the claimed invention.

- a) The method of claim 1.
- b) The method of claim 4.
- c) The method of claim 7.
- d) The method of claim 10.
- e) The method of claim 13 and 16.

These methods are used for distinct purposes (eg. breaking down immunological tolerance versus generating self immunity versus treating autoimmune disease, etc.).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1644

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron Schwadron, Ph.D. whose telephone number is 571 272-0851. The examiner can normally be reached Monday to Thursday from 7:30am to 6:00pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan, can be reached at 571 272 0841.
